Obama's first legislative act: The Lilly Ledbetter Fair Pay Act, a law that overturns a Supreme Court decision and allows an extension of the statute of limitations to sue your employer for claimed unfair practices. Should be called the Lilly Ledbetter shyster full employment act. [Social Engineering]

The law of government is: The larger government gets the more inefficient it becomes. The larger it gets the more waste is produced. And that unforeseen and indirect actions of government invariably result in side effects that are more damaging than the proposed good the act was intended to result in.

***There is a biblical saying relating to
an understanding of an issue
“on the road to Damascus”.
It was when St. Paul came to see the light of Christianity.***

This year citizens will be getting an Economic Stimulus check.

In simple terms let us explain his procedure to you:

Q: What is an Economic Stimulus Payment?

A: It is money that the Government sends to citizens.

Q: From where does the Government get these funds?

A: From you.

Q: So, the Government is giving me back my money?

A: Only a small portion of it they have a high overhead.

Q: Why are they doing this?

A: So that you will spend the money and stimulate the economy.

Q: But, everything I buy is made in China, India, and Columbia.

A: Shut up!

***How stupid is Washington?
The 2009 \$ 1.125 trillion Stimulus project is supposed
to create three million jobs.
OK that's at a cost of \$275,000.00 per job created.***

We are, as you read entering the greatest social engineering effort of American culture and civilization in the brief 200-year history of this nation. If you thought that the communist Franklin Delano Roosevelt brought great change in the political structure of our nation or that socialist Lyndon Banes Johnson was a socialist upstart I caution you to withhold your opinion until the next four years are over.

Barry Soetoro-Hussein Obama whose citizenship is in dire question will make the aforementioned social engineers seem like that of passive doves. Obama and the DNC have spent well over \$ 80,000 in stifling one after another-legal demand (over 30) for him to prove his citizenship. This has even included the Supreme Court, when he had a secret meeting with eight of the judges (1) for one and a half hours. The submitted Hawaii birth certificate was produced under Hawaii statute 338 that allows foreign born children of Hawaii residents to obtain a Hawaii birth certificate. No Hawaii hospital has produced any actual record of Obama's birth. His mother was Hawaiian which at that time was not a state, and had not reached the age of majority, and his father was Kenyan, and thus a British subject because Kenya was in the British Commonwealth. The requirement of obtaining such an after-the-fact birth certificate is the affidavit of

only one relative. There exists any number of affidavits claiming his birth in Kenya. Furthermore Obama immigrated to Indonesia as a child with his mother and stepfather Lolo Soetoro. Indonesian records indicate that his legal name was Barry Soetoro, and was a citizen of Indonesia, which does not allow dual nationality, thus his mother had denounced her American citizenship. Further evidence indicates that Obama traveled with his Indonesian passport up until the time he became an U. S. Senator.

Not since the 4th century in Europe under the Holy Roman Emperor or in the later 20th century in Russia with Putin (2) has government and religion become a conjoined enterprise in the Western World. Obama has changed that in America, our conjoined partner however is not religion it is socialism, or as now more commonly by democrats called progressive democracy. To give you an understanding of the magnitude of this change, the proposed coming stimulus package (Passed by the House on Jan. 28.09) which is to be \$825 billions, but that carries with it an additional \$ 300 to \$350 billion in interest payments (3) of that total amount it has been estimated that 2.7% are for the formation of new jobs for Americans. This spending binge of 647 pages of legislation is to be passed by congress by February 2009. That is not even enough time to read the monstrosity. This is not change it is exactly what we had under Bush for the Patriot Act, Homeland Security legislation, and the first \$700 billion (4) of stimulus that did exactly nothing except bail out Banksters who then used the funds to go on vacations, buy jets, visit spas in California, go to Scotland to play golf, and buy more political favors. Worse yet the Democrats shut out all Independents and Republicans from the structural discussions of what and how the stimulus package was to be made up. And just so you understand this perfectly well during the time of this Democrat only debate, America lost another 72,000 jobs mostly in manufacturing industries. On January 26 America lost another 55,000 jobs the greatest recorded job loss on one day in American history, and in 2008 we lost a total of 2.5 million jobs. We hope that you understand that we are now in a depression.

The entire presently structured national bailout is nothing but more government and more debt. And then to make matters worse Obama has demanded the citizens who have not paid taxes in the last quarter be included in the stimulus package with a stimulus check. A further examination of the stimulus package that Obama has repeatedly stated must be passed immediately indicates that only 55% of funds will be used in the first 18 months and that 75% of the balance will be used over the following three to four years. Apparently the only rush is passing the legislation to allow the Obama administration to begin their social engineering of the American landscape. One can only imagine why banksters and Wall Street spent \$3.3 billion on lobbying congress and the presidential candidates in 2008 with 15,000 lobbyists. America has the second highest corporate tax rate in the world, it would make a hell of a lot more sense to cut that tax rate to stimulate the economy rather than the societal engineering the progressives are sponsoring.

TARP (5) is the 2008 legislation that provided to the US Treasury a cash outlay of \$750 billion about two thirds of which has been given to friends and

associates of Mr. Hank Paulson as well as by December of last year 117 banks. The odd thing about this is that no one has any remote idea of who got the money and what they did with it. When borrowed funds are counted with the initial amount it exceeds one trillion dollars, and there is no accountability by anyone for anything. Today there are over 200 banks and still no one knows anything! Not one of these bums has gone to jail, been arrested or been charged with anything. Worse yet all the gonif's and "Ponzigoniff " who created this mess in the first place are now in charge of fixing the problems. Talk about the fox guarding the chicken coop!

As usual the media is right in the center of the entire cabal. By a margin of 78% media supported the Obama candidacy. According to reliable statistics seven out of ten media employed people voted for Obama. Our local Fishwrap here in Sarasota Florida had no less than six editorials supporting Obama and for the last week before the election ran a repeat endorsement every single day. If we transfer these numbers to the Stimulus package we can conclude that the media supports these bailouts by a margin of nine to one. Considering the financial straight of such stalwarts as the "Grey Lady" (6) among others we are hardly surprised.

One of the prime social engineering projects of the Obama administration will be EFCA (7). EFCA is the worst most undemocratic idea ever to come down the pike. In a nutshell it would allow unions to forego a secret ballot in unionizing a place of work and simply get 50% plus one employee to sign a union card and then by force unionize the entire establishment, forcing 49% of the undeclared workers to join the union and pay its dues. This gets us right into a 10th amendment issue (8) in that such a law is in violation of the Bill of Rights, infringes on state rights and would overturn right to work laws in fourteen of the states. Worse yet if enacted it will make America internationally uncompetitive and further erode our export markets, drive up prices of what little domestic manufacture still exists, and be a huge additional drag on the economic recovery.

Let us be clear as a bell's pitch. We are entering the era of group politics. Group politics will be the standard procedure for at least the coming two years. And be assured that neither in our Constitution, Bill of Rights, and Federalist Papers nor in any single founding document is there any group rights granted to any group. Group rights are the preview of communism, as they have always been. With partisan progressives like Obama, Reid and Pelosi there can be no other outcome, especially with the progressive wing of the democrat party in full control of the legislative as well as executive branches of government. Lest we forget all constitutional and Bill of Rights granted rights are to the States and to individuals, not one is to a social, religious, racial, sexual or any other group.

One of the objectives of the progressives is to pass the GPA (Global Poverty Act), which is the outcome of the UN Millennium Development Goal. This horrific idea is that the United States along with the developed world must fund all third world economies to reduce poverty. This group effort is based on the false idea that the developed world is developed due to luck, and happenstance, not work and effort and application of knowledge, and that people who are pitiable are poor because of a quirk in nature, climate, and history. That's just

plain stupid. The third world exists in poverty because the people living there do not apply themselves to their problems do not educate themselves, and in many cases are lazy. This legislation if passed by congress and made law would require America to increase foreign aid from the present \$ 23 billion to \$98 billion annually. As we are broke this is not an option.

We anticipate huge increases in all sorts of group rights for any and all minorities not only in financial terms but also in social ones. Social group rights will cause the expansion of racial disharmony, and racism will be its product. This has already shown up with the Obama administration appointing more Jews than any other group to executive positions nationally considering that Jew are about 3% of the population and now are over 70% of executive positions and hold 45 legislative offices one can only wonder what's next? . With this will come another legislative boondoggle, Hate Laws, that have been demanded by the JDL, SPLC, WZF, (9) for years. This then again pits the administration and legislature against the First amendment of the Constitution, the Bill of Rights, which has always been an anathema to zionists. The zionists have long understood that only through the application of law are you able to support the holocaust pipe dream. Truth in fact does not require law as a pit bull to enforce its position.

The fact of the matter being that as such social legislative actions are brought to the forefront and possibly is enacted that it will have a deleterious effect on the economy and will, if God willing we had an economic recovery destroy it. A basic point of our position is that we distrust Obama for more than one reason, and suspect that he will fulfill the Bush enacted executive positions to solidify his grasp of society. The fact that the mob is behind Obama is frightening consider the words of Seneca about mob rule. We warned that this would be the most important election in American history; the radical enactments of the progressives will prove us correct within six months.

Anyone who actually believes that these stimulus packages relate to the economy must be comatose. All these efforts relate to changing our social structure, elimination our long-standing constitutional freedoms, centralization of power in Washington, and group rights for all the minority groups that have historically supported the socialist (Progressive) Democrats. Identifying these culprits is simple as pie. Feminists, Environmentalists, Unionists, Homosexuals, Hispanics, Blacks, Jews, and Zionists, are those groups that most actively supported Obama, and they are the ones who will demand payback.

Returning to the 2008 stimulus package we see that out of the first \$355 billion of appropriated funds by Congress the COB (Congressional Budget Office) estimated that only \$26 billion will be spent in 2009 and that only \$110 billion in 2010. So with all, that urgency "you must pass this legislation or the sky will fall" (G.W. Bush) was as usual more Bushbunk. In fact all the proposals to place moneys into circulation and to stimulate consumer confidence and consumer purchasing has proven to be a very effective smoke screen to keep the electorate from learning exactly what the plan is. A rough breakdown of the entire plan is \$143 billion for education, \$111 Billion for healthcare, \$90 Billion for infrastructure, \$72 billion for the aged, and disabled, \$54 billion for energy revitalization, and \$60 billion for science and technology. We must be the only

people on the planet, who can't locate any relief for the middle class, help for small business, reform of the deleterious effects of free trade, but then we have it straight from the horses mouth, Nancy Pelosi, who said, "Contraception is a source of economic stimulus". This would only be the case if her mother had rigorously employed it!

Education issues relating to the faux quality of American education, scenario is to get \$ 143 billions. This in effect would triple federal spending on education. One can suppose that this is payback for the AFT and NEA (10) unilateral support of Obama and the Democrats in the 2008 election. In truth these two unions (The largest in America) are the culprits responsible for the dumbing down of America and the lagging international record of academic standards. Always opposed to teacher competency testing, magnet schools, means testing, and anything that would actually work in improving education standards in America, they are certainly one of the concerns in our continuously declining international student standings. The concept of a nationalized education system stems from Prussia and is basically un-American. Another leftist Democrat Jimmy Carter in 1979, started the US Department of Education. Ever since 1979 education in America has gone downhill. From about 7th in international ratings we are now in the 30's. To further improve this situation Mr. Obama has appointed Arne Duncan to head the agency. Arne was the CEO of the Chicago school district, arguably the worst school district in America. His parent's could not even spell ARMY. The department of education disposes over a budget of \$56 billion and had 5,000 employees in 2006. Out of every dollar collect in taxes and provided to DE. \$075 cents go for payroll and operational overhead. But that as they say is only the tip of the iceberg. Un-funded mandates by this federal agency are used like a bludgeon against local school districts driving the average cost per pupil up by no less than 40%, which is then translated into an at minimum 20% increase in local property taxes. Anyone with any common sense would abolish this agency, which is by the way un-constitutional, lay off 5,000 edu-crats, save \$ 56 billion on federal taxes and about \$200 billion on local property taxes through the elimination of un-funded federal mandates. Property taxes would remain about the same with the elimination of the mandates, and schools run locally by parents would improve immediately. This would be a win win scenario.

Healthcare in America is a national disgrace. Statistically healthcare costs beginning in 1972 rose from one billion dollars to 2,5 billion in '78. From 1970 to 2004 costs doubled every ten years, to \$1.9 trillion in 2004. It has been estimated that a landslide of paperwork incurs over 40% of healthcare costs mandated by federal laws, and insurance companies. As in all run bureaucracy, operations general overhead costs exceed those of unregulated business by a factor of two. Fraud especially by hospitals is unprecedented in imaginary services provided billings to insurance carriers. Worse yet lawyers who advertise on TV for clients to sue hospitals doctors, and insurance companies bring on the liability insurance problem. The economic fix by Obama is to throw \$111 billion at the problem not only will this solve nothing it will compound the problem. In fact American healthcare does not need money it needs tort reform. Obama is a lawyer the

chances of tort reform from a congress and executive that consists 90% of lawyers will never become a reality. With a cap on medical law suites, the dismissal of frivolous suites, which are at minimum 50% of all suites, the cost of medical services would decline by one third. Requiring less paperwork from healthcare providers could easily cut another 25% of costs. And shutting down HHS (Health and Human Services) this agency which is to be given \$111 billion on Jan 29.09 did not even have a published budget for 2009. Their Internet site comes up with empty boxes on a budget form. The HHS budget (2008) was about \$700 billion. Which works out to about \$2,333.00 per American, including illegals. Why not simply shut down HHS and provide every American free healthcare. Present insurance costs per citizen for healthcare are certainly below \$ 2,333.00 each.

Our infrastructure has been on a gradual decline for the last 40 years. The last president that gave it any credence was Eisenhower with the construction of the interstate highway system. Obama proposes to provide \$ 90 billion for infrastructure. This entire issue is bogus. 18.4 % of every consumed gallon of fuel is federal excise tax. Let's say that the average fuel price in 2008 was \$ 2.75 per gal, that works out to \$ 0.50.6 cents per gal. All of those funds go to the Federal Highway Trust fund, and are then immediately looted by congress and no one has any idea what they do with the money. We do know that they place an IOU in the kitty the same as with the Social Security Trust fund. In addition to this states also ad tax in Florida per example the state ads \$0.14.7 cents and in some counties an additional tax of up to \$0.12 cents is added. So on one lousy gallon of gas, combined taxes on a selling price of \$2.75 are \$ 0.77.3 cents of taxes on every gallon of fuel. Statistically the United States consumed about 3.34 million barrels of oil. For the sake of argument let's assume that each barrel produces about 40 gallons of gas. That means that federal state and local governments collect about \$ 103.2 billion dollars in taxes, now we have some questions, where the hell is the money and what was done with it? And how much moneyed IOU's does the highway trust fund actually have on their books? Aside from that there does little doubt but that the entire road infrastructure and RR infrastructure needs an overhaul badly. This has to be divided into separate funds A) repair and B) new construction. For 1009 and 2010 only repair should be done and for B) only planning and permits for begin construction in 2011. Repair should be restricted to RR lines and track and road of the Interstate system. Allocation of funds for projects should be controlled on a job-by-job basis and a corps of retired contractors to assign work in states in which they were never active should identify projects. All funding should come from the Highway trust fund to which congress should no longer have any access.

The aged and disabled should before anything is done, be means tested. There is so much phony disability compensation paid out that it staggers the mind. We are personally aware of scores of disability claims that are completely bogus. The government from the very beginning has been screwing Social Security recipients. Obama proposes to spend \$ 72 billion on this issue. We do not think this is a realistic figure it is much too high. All Social Security recipients should see realistic payment increases commensurate with the real (11) rate of

inflation. To legitimize present recipients every one of them should get a 20% increase immediately. Welfare payments should be divorced from SS, as should disability compensations. People who were self employed for long terms of time and paid double SS taxes should be compensated at higher rates. Healthcare billings against SS should be based on lifestyle and health. Those who live healthily active lives should not be punished by those who don't. All self-induced illness like smoking, alcoholism, drug addiction, and psychotic behavior should not be covered by SS, or healthcare and be exempt from private insurance coverage.

The proposal of \$ 54 billion for energy is an interesting Idea, and we know exactly where to get the funds for that. Shut down the Department of Energy and you already have saved \$25 billions. Of all the government agencies that are worthless the two most useless are the DOE and the BATF. The annual BATF (12) budget is 8.12 billions, that leaves us with \$ 20,8 billion profit for shuttering down two worthless agencies.

The idea that government is an active participant in technological development is a myth originating in academia, which hopes to get a large portion of this money. \$60 billion to universities whose professors are grossly under worked and massively overpaid and will produce zero middle class or small business employment is outright stupidity. Consider all the technological advancements of western civilization of importance and name one that came out of a university. Roentgen, Edison, Tesla, Krieg and scores of inventors were never connected to any university. One way of solving this dilemma is to force the return of the Patent department back to the way that applications were made in the 60's where you could draw up a patent and get it approved without the intermediary lawyer that has now driven the cost into the thousands of dollars. Another simple way is to allow corporations accelerated depreciation on machinery used in R&D, and to write off the entire spent R&D expense, including relating payroll in the year it was incurred.

Some of the really dumb ideas in the proposed financial stimulus package are: \$335 million for sexually transmitted diseases. Tell the morons to either use a condom or to keep it in their pants. \$650 million for digital TV conversion boxes, better the idiots read a book and not watch any TV. \$400 million to study climate change. Brother that's a boondoggle. How do you get the sun to reduce solar radiation, which is responsible for 96.5% of climate change? \$50 million for the National Endowment of the Arts, great let's buy 25 Stradivarius violins for some of our greater orchestras. This is sure to raise employment. \$4 billion to expand the war on drugs and the COPS program through Byrne grants, these were even opposed by Bush. \$20 Billion is intended to go for a healthcare recording system of national healthcare records without adequate privacy protection. \$250 million for states to nationalize students records, hi big brother! \$79 billion to bail out states that have acted fiscally irresponsible so as to be bailed out by those who were responsible. \$200 million to expand Clintonjugend oops, sorry AmeriCorps. \$200 million to encourage the use of electric cars, and I thought that was the job of economics. \$746 million for after school snacks, hey caviar and Champaign are not cheap. \$1 billion for a new census, well, let's see

that works out to \$ 3.15 per citizen counted. \$6.7 billion for the US Department of Commerce, what for we are not told. \$45 million for ATV trails, no comment \$4 billion for ACORN who is in federal courts in over ten states on voter fraud charges, \$600 million for new government cars, mine is four years old, \$75 million to get you to stop smoking, I don't smoke! ETC. \$2 billion for national parks; I wonder how many jobs that will create? \$ 1 billion out of 1,5 trillion for small business that creates 80% of all jobs in America. \$14 billion for energy efficiency, how, what, where? \$4 billion for medical advances, what sort of?

All this works out to an additional tax burden of \$ 6,700.00 for every living American!

See this is change!

The fact of the matter is that no one in or out of government has been given the opportunity to review this horrific legislation that the House has already passed and that has probably not been read in total by any single legislator. The entire legislation was drawn up by the progressive caucus of the Democrat party, which purposely kept out all other parties of the political process, and is nothing less than a huge social engineering project to change the United States into a socialist hellhole. The bill reflects not only partisan politics but also a decided group favoritism to social, racial, sexual, and environmental groups, which are the major backers of the political left. It does not represent a cross section of America and is directed to the interests of less than 10% of the American electorate.

- (1) Supreme Court justice Samuel Alito was absent. (This is the first in history secret meeting between the Justices and a president-elect).
- (2) Russia under Putin has developed into an oligarchic government that has joined the Russian Orthodox Church and the Kremlin under the leadership of Putin and the new Russian Orthodox Prelate Metropolitan Kirill who was previously the Orthodox Secretary of state. Distinction between the Church and the Kremlin is impossible. Kirill was previously Secretary of State of the Church.
- (3) The government does not have the \$825 billion they have to borrow it at interest and that interest cost is \$300 to \$ 350 billion thus driving the total amount of the package to \$1 trillion 1.25 billion.+
- (4) The Bush stimulus package when all the factors are counted was over two trillion dollars. \$150 bil. Pork, \$250 Bil interest, \$ 125 Bil. AIG, \$ 344 Bil. Freddie and Fannie, \$10 Bil. Treasury, \$29 Bil local communities, \$ 200 Bil. Bear Sterna, \$ 87 Bil JP Morgan, \$200 Bil. Bank bailouts, etc. and so forth.
- (5) TARP Troubled Assets Relief Program was instituted under Public Law 110-343 The Emergency Economic Stimulation Act of 2008. It has until Jan 20th been administered by Sec. of the Treasury Hank Paulson.
- (6) Media slang for the NY Times (Fishwrap of the century!)
- (7) EFCA Employee Free Choice Act a product of the Teamsters and AFL/CIO labor unions.
- (8) The tenth amendment: *The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively to the people.*
- (9) JDL Jewish Defense League, SPLC Southern Poverty Law Center, WZF, World Zionist Federation.
- (10) AFT American Federation of Teachers, NEA National Education Association.

- (11) Government reported inflation statistics are bogus as any housewife can tell you. Real inflation over the past 4 years is about 20%. Proof is in the congressional pay raises that exceed \$ 30,000 over the last four years.
- (12) BATF Bureau of Alcohol Tobacco and Firearms. The absolutley worst agency of the US government.
